ITEM# 2012-146 INTRO: 06/07/12

SUMMARY

TO: Town Council

FROM: Thomas K. Lynch, Acting Town Manager

DATE: May 29, 2012

SUBJECT: Appropriation of \$329,000 for the purpose of making tidal flow improvements at

Stewart's Creek.

BACKGROUND: Stewart's Creek Inflow Improvement Project. The lack of flushing in Stewart's Creek has resulted in an increased accumulation of nutrients and silts and organic matter, thereby causing very obvious, offensive odors. Final design plans and specifications are complete to install a larger culvert to increase the flow of water to increase flushing. Federal, state and local permitting is complete for the work proposed. The project is expected to be publicly bid during the summer of 2012, with work commencing in September. The project is expected to be completed by December, 2013. The Federal Army Corp of Engineering is funding 2/3rds the cost of this project.

FISCAL IMPACT: The original funding source for this appropriation was a bond issue. The Town typically bundles its borrowing authorizations to save money on issuance costs as opposed to issuing bonds on individual projects. The bonds for this project were never issued due to delays in permitting the project and the uncertainty of when the project would commence. The Town currently has no other borrowing requirements with which it could combine this project. Therefore, we are proposing to replace the funding mechanism for this project which will allow the Town to avoid the cost of issuing a bond as well as the interest on the bond. There are adequate reserves within the Capital Trust Fund to cover the cost of this project.

TOWN MANAGER RECOMMENDATION: The Town Manager requests favorable action by the Town Council.
