SANDY NECK COASTAL RESILIENCY PROJECT

The Town of Barnstable is investing in the future of Sandy Neck Beach through a major coastal resiliency project.

This work is designed to ensure continued public access despite erosion, flooding, and the impacts of sea level rise now and into the future.

Project Goals

- Reduce vulnerability to erosion, dune loss, and flooding.
- Design solutions built to last 50+ years.
- Maintain safe public access to Sandy Neck.
- Protect sensitive habitats and coastal ecosystems.
- Ensure cost-effective, maintainable design.
- Meet all state and federal environmental regulations.

Groundbreaking Celebration for the Long-Term Coastal Resiliency Project

September CoastSweep Beach Cleanup

Thank you to MBBA and all the volunteers that joined us on September 14th!

Clam Crawl

The Massachusetts Shellfish Officers Association offers an award program for high school seniors residing in Massachusetts coastal towns who plan to pursue a degree in marine biology.

Eagle Scout Project Update

Boxes are all built, and signs are being made!

Upper Cape Tech Field Workday (Dune Restoration Efforts)

Congratulations!

Keely Ashe-Alex has been hired as the Sandy Neck Natural Resource Officer.
